PROFESSIONAL SUMMARY

Data Engineer with hands-on experience building end-to-end ETL/ELT pipelines, lakehouses, and analytics solutions using Python, SQL, Apache Spark, Databricks, and Power BI. Skilled in Medallion Architecture, dimensional modeling, and large-scale data processing, with a proven record of freelance delivery and business-focused data solutions.

PROFESSIONAL EXPERIENCE

Freelance Data Engineer | Khamsat, Nafezly & Kafil

04/2026 – 06/2026

- Delivered 3 freelance data engineering projects, achieving 5-star client ratings across all engagements.
- Built a web-based inventory automation platform for a Saudi retail client, streamlining stock management workflows.
- Automated SKU generation for product variants based on attributes such as color and size options.
- Integrated product and inventory datasets to reconcile stock quantities and generate upload-ready files for the Salla e-commerce platform.
- Reduced manual operational effort by converting repetitive spreadsheet-based workflows into fully automated processes.

PROJECTS

Unified Crypto Intelligence Lakehouse

[Repository](#)

- Collaborated in a 5-member team to build a Lakehouse pipeline using PySpark and Azure Databricks, processing 37K+ records from batch and streaming data.
- Applied Structured Streaming and NLP sentiment analysis on simulated social media data to generate market signals.
- Designed a Galaxy Schema (2 facts, 5 dims) and trained a GBT model achieving 96.1% accuracy with 3.9% MAPE.
- Automated ingestion, prediction workflows, and refresh cycles using Databricks Workflows.
- Delivered a 4-page Power BI dashboard covering technical indicators, sentiment analysis, and price forecasting.

Financial Transaction Analytics Data Warehouse

[Repository](#)

- Built a Medallion architecture pipeline processing 22.2 million financial records using Airflow, dbt, DuckDB, and PostgreSQL.
- Replaced Pandas with DuckDB, reducing processing time from 20 minutes to 4 minutes.
- Designed a Star Schema with dbt models and SQL indexing to enable sub-second analytical queries.
- Identified \$1.4M in fraud exposure using Power BI dashboards and transaction analytics.

E-commerce Data Warehouse & Analytics Dashboard

[Repository](#)

- Engineered a SQL Server data warehouse to process 1.58 million records from the Olist e-commerce dataset.
- Implemented Medallion Architecture for structured Bronze-to-Gold data transformation.
- Designed a Galaxy Schema supporting multi-fact analysis across Sales, Logistics, and Reviews.
- Optimized query execution time using advanced T-SQL and high-performance stored procedures.
- Developed a 4-page Power BI dashboard tracking \$14M in revenue and key operational KPIs.

SKILLS

Languages: Python (Pandas, NumPy, PySpark), SQL

Data Engineering: ETL/ELT Pipelines, Data Warehousing, Medallion Architecture, Dimensional Modeling, dbt

Cloud & Data Platforms: Azure (ADF, ADLS Gen2), Databricks, Snowflake, BigQuery

Databases: SQL Server, PostgreSQL, DuckDB

Big Data: Apache Spark, Delta Lake, Hadoop, Hive

Orchestration & Tools: Apache Airflow, Docker, Git/GitHub, Linux

Data Visualization: Power BI, Tableau

EDUCATION

Bachelor's Degree in Computer Science

2024 – Expected 2028

Modern Academy

LANGUAGES

Arabic: Native | English: Professional Working Proficiency
